

About Linda R

I am driven by a passion for transforming education through the integration of technology, creativity, and digital well-being. With over 15 years of experience across the UAE and India, I have worked across diverse roles that have shaped my mission to empower learners and educators worldwide. As the AGM-Operations at Takyon System Solutions Pvt Ltd, I lead initiatives that redefine learning experiences, ensuring the alignment of technology with student growth and innovation.

In my role as the STOGO SUITE IT Project Manager and Global Project Manager of STOGO FEST, I am dedicated to creating hands-on opportunities for students to explore Robotics, AI, and digital well-being while fostering innovation and responsible technology use. STOGO FEST is more than a competition; it is a platform that nurtures creativity, critical thinking, and leadership among young innovators.

My expertise includes serving as a Resource Person for AI, Coding, and Robotics, and Nodal Officer for NTA Examinations. I have held key academic leadership roles such as Session Head, IT Department Head, and IT Coordinator, where I led IT curriculum implementation, staff training, and major project developments. My work extends beyond the academic sector, having served as a Project Coordinator at Intron FZE and Technical Support Officer at HCL Technologies, handling IT coordination and technical support.

I am also actively engaged in professional development training, equipping educators with the tools and skills needed to integrate AI, Robotics, and innovative teaching methods effectively into their classrooms. Additionally, as the Country Representative (UAE) for the Okinawa Shorin Ryu Karate Do Uden-Ti Kobujutsu Association, I promote holistic growth through discipline, physical development, and life skills.

My mission is to create meaningful and future-ready learning environments that inspire students to solve real-world challenges and become ethical, confident leaders in a rapidly evolving digital landscape. Through my work with STOGO FEST and technology-driven educational platforms, I strive to foster innovation, collaboration, and lifelong learning, helping students and educators embrace the opportunities of the digital age.

As AGM-Operations at Takyon System Solutions Pvt Ltd, my role involves overseeing financial planning, resource allocation, compliance, and employee management while coordinating cross-departmental activities. By integrating innovation and operational excellence, I contribute to the successful execution of projects in AI, Robotics, and digital education solutions.

As the UAE Representative of the Okinawa Shorin Ryu Karate Do Uden-Ti Kobujutsu Association, I promote the values of traditional martial arts by organizing training sessions, workshops, and events that emphasize discipline, physical fitness, and character development.

My role focuses on fostering innovation, optimizing digital resources, and supporting both educators and students in leveraging technology for enhanced learning experiences.
